

# WaterlineX®

## CLOSED Dental Water Bottle System With Air Purge

Anodia Systems Dental Manufacturer #: MAK-1806

### INSTALLATION INSTRUCTIONS

#### STEP 1 | MOUNTING WaterlineX

- Identify a suitable location to mount on a vertical 2" post or a vertical flat surface.
- WaterlineX** should be mounted in a suitable location so the dentist or dental staff has easy access.
- The location should be as close as possible to the dental unit's internal tubing of air and water.

#### STEP 2 | TUBING CONNECTIONS

- Turn dental unit **OFF**.
- Locate a 1/8" Air line (yellow) connected to the dental unit's **ON/OFF** switch. Cut this line and "T" to line to the **WaterlineX** Air line.
- Connect dental unit's waterline.

#### STEP 3 | INSTALLATION CHECK

- Turn dental unit **ON** and check for air leaks.

#### STEP 4 | OPERATION CHECK

- Turn WaterlineX System **OFF**.
- Fill dental water bottle with water.
- Turn **WaterlineX** System **ON** and check for water flow and leaks.
